Do You Have
Dehydrated Sensitive Skin?
你有**缺水敏感肌膚**的癢狀嗎？

Dehydrated sensitive skin has low tolerance to the most effective humectant molecules, such as urea and glycerine. There is higher transepidermal water and natural urea loss which leaves the skin prone to Redness, Tingling, Burning, Itching, Tightness & Discomfort feeling.

缺水敏感肌膚對多種最有效的人工保濕劑如甘油和尿素分子耐受性較低。由於表皮層脆弱，水份和天然尿素容易經皮膚表皮層流失，導致皮膚泛紅、刺痛、灼熱、瘙癢繃緊及不適等問題。
